VOLUME CONTENTS

January

E. R. G. Eckert	1	Fran Bošnjaković on the occasion of his 85th birthday
R. I. Soloukhin and O. G. Martynenko	3	Heat and mass transfer bibliography—Soviet works
V. Yakhot, S. A. Orszag and A. Yakhot	15	Heat transfer in turbulent fluids—I. Pipe flow
K. Kitamura and T. Inagaki	23	Turbulent heat and momentum transfer of combined forced and natural convection along a vertical flat plate—aiding flow
R. J. Krane	43	A Second Law analysis of the optimum design and operation of thermal energy storage systems
H. Herwig	59	An asymptotic approach to compressible boundary-layer flow
H. M. Joshi and R. L. Webb	69	Heat transfer and friction in the offset strip-fin heat exchanger
P. M. Kolesnikov	85	Generalized boundary conditions of the heat and mass transfer
U. Projahn and H. Beer	93	Thermogravitational and thermocapillary convection heat transfer in concentric and eccentric horizontal, cylindrical annuli filled with two immiscible fluids
A. G. Kirdyashkin	109	Thermocapillary periodic flows
J. Bellan and K. Harstad	125	Analysis of the convective evaporation of nondilute clusters of drops
B.-X. Wang, D.-H. Shi and X.-F. Peng	137	An advance on the theory of forced turbulent-flow film boiling heat transfer for subcooled liquid flowing along a horizontal flat plate
J. T. Hong and C. L. Tien	143	Analysis of thermal dispersion effect on vertical-plate natural convection in porous media

M. A. HESSAMI, G. DE VAHL DAVIS, E. LEONARDI and J. A. REIZES — 151 Mixed convection in vertical, cylindrical annuli

H. TANAKA, S. MARUYAMA and S. HATANO — 165 Combined forced and natural convection heat transfer for upward flow in a uniformly heated, vertical pipe

E. M. SPARROW, A. GARCIA and W. CHUCK — 175 Turbulent duct flow with streamwise nonuniform heating at the duct wall

L. GLICKSMAN, M. SCHUETZ and M. SINOFSKY — 187 Radiation heat transfer in foam insulation

Technical Notes

J. GEMBAROVIČ and V. MAJERNÍK — 199 Determination of thermal parameters of relaxation materials

K. HIMASEKHAR — 201 Integral analysis of conjugate natural convection heat transfer from a long, vertical fin

M. SHOUKRI and A. CALKA — 203 On the heat transfer characteristics of constrained air jets impinging on a flat surface

G. GROSSMAN — 205 Analysis of interdiffusion in film absorption

J. J. JOU and J. S. LIAW — 208 Thermal convection in a porous medium subject to transient heating and rotation

Book Reviews

S. KAKAÇ — 213 Solar Thermal Storage, by H. P. GARG, S. C. MULLICK and A. K. BHARGARA

D. B. SPALDING — 213 An Introduction to the Finite-element Method with Applications to Non-linear Problems, by R. E. WHITE

213 Technical Guide to Thermal Processes, by J. GOSSE

February

Y. MORI, I. TANASAWA and R. ECHIGO — i Professors Takashi Sato, Tokuro Mizushina and Kaneyasu Nishikawa on their 65th birthdays and retirement from the Honorary Editorial Advisory Board

K. SUZUKI — ii Professor Takashi Sato

F. OGINO — iii Professor Tokuro Mizushina

Y. FUJITA — iv Professor Kaneyasu Nishikawa

W. CHUCK and E. M. SPARROW — 215 Evaporative mass transfer in turbulent forced convection duct flows

A. M. SADEGH, L. M. JIJI and S. WEINBAUM	223	Boundary integral equation technique with application to freezing around a buried pipe
CH. CHARACH and P. B. KAHN	233	Solidification in finite bodies with prescribed heat flux: bounds for the freezing time and removed energy
A. HILL and A. J. WILLMOTT	241	A robust method for regenerative heat exchanger calculations
A. S. LAVINE, R. GREIF and J. A. C. HUMPHREY	251	A three-dimensional analysis of natural convection in a toroidal loop—the effect of Grashof number
K. HIMASEKHAR and H. H. BAU	263	Thermal convection associated with hot/cold pipes buried in a semi-infinite, saturated, porous medium
J. ŠIMONEK	275	The turbulent viscosity model and inherent laws of the near-wall turbulence
W. R. PATERSON, R. A. COLLEDGE, J. I. MACNAB and J. A. JOY	279	Solid–gas mass transfer measurement by the swollen polymer method: proving of swelling agents
M. DE PAZ, M. PILO and G. SONNINO	289	Non-linear, unsteady free convection in a vertical cylinder submitted to a horizontal thermal gradient: measurements in water between 6 and 21°C and a theoretical model of convection
B. PERRIN et R. JAVELAS	297	Transferts couples de chaleur et de masse dans des matériaux consolides utilises en génie civil
K. J. CHOI and S. C. YAO	311	Mechanisms of film boiling heat transfer of normally impacting spray
E. ZIMMERMAN and S. ACHARYA	319	Free convection heat transfer in a partially divided vertical enclosure with conducting end walls
M. HENDRIX, A. LEIPERTZ, M. FIEBIG and G. SIMONSOHN	333	Thermal diffusivity of transparent liquids by photon correlation spectroscopy—I. Results for toluene and methanol in an extended range of temperature and pressure
H. C. ÜNAL	341	An analytic study of boiling heat transfer from a fin
S. KUMAR and N. D. KAZARINOFF	351	Stability of a free convection density-extremum flow in a porous medium
M. FAGHRI and N. RAO	363	Numerical computation of flow and heat transfer in finned and unfinned tube banks

D. R. Webb and D. Panagoulias 373 An improved approach to condenser design using film models

C. T. Avedisian and J. Koplik 379 Leidenfrost boiling of methanol droplets on hot porous/ceramic surfaces

Technical Notes

S. Cobbinah, C. Laguérie and H. Gibert 395 Simultaneous heat and mass transfer between a fluidized bed of fine particles and immersed coarse porous particles

P. K. Nag and P. Mukherjee 401 Thermodynamic optimization of convective heat transfer through a duct with constant wall temperature

B. F. Armaly, T. S. Chen and N. Ramachandran 405 Correlations for laminar mixed convection on vertical, inclined and horizontal flat plates with uniform surface heat flux

C. K. Aidun and S. P. Lin 408 Large amplitude modulation of heat transfer from a circular cylinder

Letter to the Editors 413

March

E. Hahne 415 Professor Dr.-Ing. Dr.e.h. Ulrich Grigull on his 75th birthday

Y. Mori and R. Echigo 417 Heat transfer bibliography—Japanese works

E. M. Sparrow and A. A. Yanez Moreno 427 Effect of yaw on forced convection heat transfer from a circular cylinder

A. Soufiani and J. Taine 437 Application of statistical narrow-band model to coupled radiation and convection at high temperature

G. P. Celata, M. Cumo, G. E. Farello and G. Focardi 449 Direct contact condensation of superheated steam on water

G. P. Celata, M. Cumo, G. E. Farello and G. Focardi 459 A theoretical model of direct contact condensation on a horizontal surface

N. Zhang, B. X. Wang and Y. Xu 469 Thermal instability of evaporating drops on a flat plate and its effects on evaporation rate

C. Vives and C. Perry 479 Effects of magnetically damped convection during the controlled solidification of metals and alloys

S. Hatamiya and H. Tanaka 497 Dropwise condensation of steam at low pressures

J. P. du Plessis and D. G. Kröger 509 Heat transfer correlation for thermally developing laminar flow in a smooth tube with a twisted-tape insert

V. A. Sosinovich, B. A. Kolovandin, V. A. Tsyganov and C. Meola — 517 — A statistical turbulent reacting flow model

M. L. Mittal, H. R. Nataraja and V. G. Naidu — 527 — Fluid flow and heat transfer in the duct of an MHD power generator

P. Vasseur, M. G. Satish and L. Robillard — 537 — Natural convection in a thin, inclined, porous layer exposed to a constant heat flux

M. A. Dudeck — 551 — Evolution thermique d'une sonde électrostatique dans un gaz raréfié et partiellement ionisé

K. Kataoka, M. Suguro, H. Degawa, K. Maruo and I. Mihata — 559 — The effect of surface renewal due to large-scale eddies on jet impingement heat transfer

S. H. Han and S. G. Bankoff — 569 — Thermal interactions of a molten tin drop with water triggered by a low-pressure shock

S. G. Bankoff and S. C. Lee — 581 — Flooding and hysteresis effects in nearly-horizontal countercurrent stratified steam–water flow

I. Opaliński and A. Wolny — 589 — Discontinuity of particle contact with the surface and heat transfer in fluidized beds

Technical Notes

E. M. Sparrow and C. K. Carlson — 601 — Experimental investigation of heat flux uniformity at thin, electrically heated metallic foils

V. R. Voller — 604 — A heat balance integral method based on an enthalpy formulation

S. Ramachandran, C. Kleinstreuer and E. R. Altwicker — 607 — Mass transfer to an accelerating multidrop system

P. A. A. Laura, V. H. Cortínez and R. Carnicer — 610 — Steady-state temperature distribution in a doubly connected, orthotropic region with heat generation

April

A. Chaboki and E. M. Sparrow — 613 — Melting in a vertical tube rotating about a vertical, colinear axis

J.-Y. Liu, S.-D. Shih and W. J. Minkowycz — 623 — Conjugate natural convection about a vertical cylindrical fin with lateral mass flux in a saturated porous medium

P. K. Das, G. S. Bhat and V. H. Arakeri — 631 — Investigations on the propagation of free surface boiling in a vertical superheated liquid column

C. Nouar, R. Devienne et M. Lebouche	639	Convection thermique pour l'écoulement de Couette avec debit axial; cas d'un fluide pseudo-plastique
C. Saidi, F. Legay-Desesquelles and B. Prunet-Foch	649	Laminar flow past a sinusoidal cavity
S. M. Correa	663	Fluid flow and heat transfer in incandescent lamps
K. A. Antonopoulos	673	Pressure drop during laminar oblique flow through in-line tube assemblies
H. I. Andersson	683	Diffusion from a vertical wall into an accelerating falling liquid film
A. K. Kulkarni, H. R. Jacobs and J. J. Hwang	691	Similarity solution for natural convection flow over an isothermal vertical wall immersed in thermally stratified medium
P. Payvar	699	Mass transfer-controlled bubble growth during rapid decompression of a liquid
L. S. Yao	707	Is a fully-developed and non-isothermal flow possible in a vertical pipe?
P. Vasseur and L. Robillard	717	The Brinkman model for boundary layer regime in a rectangular cavity with uniform heat flux from the side
M. Sen and K. E. Torrance	729	Natural convection in a thin horizontal porous annulus
S. L. Moya, E. Ramos and M. Sen	741	Numerical study of natural convection in a tilted rectangular porous material
D. A. Goussis	757	Effects of viscous dissipation on the stability of a liquid film flowing down a heated inclined plane
A. H. George	763	A transducer for the measurement of instantaneous local heat flux to surfaces immersed in high-temperature fluidized beds
Y. C. Fey and M. A. Boles	771	An analytical study of the effect of convection heat transfer on the sublimation of a frozen semi-infinite porous medium
W. P. Webster and S. Yavuzkurt	781	Measurements of mass transfer coefficient and effectiveness in the recovery region of a film-cooled surface

P. L. KIRILLOV, V. M. KASHCHEYEV, Yu. V. MURANOV and Yu. S. YURIEV — 791 — A two-dimensional mathematical model of annular-dispersed and dispersed flows—I

P. L. KIRILLOV, V. M. KASHCHEYEV, Yu. V. MURANOV and Yu. S. YURIEV — 801 — A two-dimensional mathematical model of annular-dispersed and dispersed flows—II

Technical Notes

E. M. SPARROW, S. S. KANG and L. M. HOSSFELD — 807 — Heat or mass transfer adjacent to the free end of a rotating cylinder

L. S. YAO — 810 — Linear stability analysis for opposing mixed convection in a vertical pipe

L. M. SIMEZA and M. M. YOVANOVICH — 812 — Shape factors for hollow prismatic cylinders bounded by isothermal inner circles and outer regular polygons

Book Reviews

D. B. SPALDING — 817 — Directory of Microcomputer Software for Mechanical Engineering Design, by O'CONNELL, SHEVIAK, BROWNE and JOHNSON

N. C. MARKATOS — 817 — Numerical Methods for Engineers with Personal Computer Applications, by S. C. CHAPRA and R. P. CANALE

May

R. I. SOLOUKHIN and O. G. MARTYNENKO — 819 — Heat and mass transfer bibliography—Soviet works

QIAN RENZHANG, HUANG WENDI, XU YUNSHENG and LIU DECHANG — 827 — Experimental research of radiative heat transfer in fluidized beds

M. CIAMPI, S. FAGGIANI, W. GRASSI, G. TUONI and F. P. INCROPERA — 833 — Mixed convection heat transfer in horizontal, concentric annuli for transitional flow conditions

C. Y. SHIEH and W.-J. YANG — 843 — Transient thermocapillary flow in rectangular tanks with phase change

A. K. SEN — 855 — Natural convection in a shallow porous cavity—the Brinkman model

G. P. FLACH and M. N. ÖZIŞIK — 869 — Periodic B-spline basis for quasi-steady periodic inverse heat conduction

L. J. HUANG and P. S. AYYASWAMY — 881 — Heat and mass transfer associated with a spray drop experiencing condensation: a fully transient analysis

T. IGARASHI — 893 — Fluid flow and heat transfer around rectangular cylinders (the case of a width/height ratio of a section of 0.33 ~ 1.5)

J. L. Bassani, M. W. Nansteel and M. November	903	Adiabatic–isothermal mixed boundary conditions in heat transfer
J. Gaviglio	911	Reynolds analogies and experimental study of heat transfer in the supersonic boundary layer
J. Y. Yoo, P. Park, C. K. Choi and S. T. Ro	927	An analysis on the thermal instability of forced convection flow over isothermal horizontal flat plate
J. Kubie	937	Steady-state conduction in stagnant beds of solid particles
P. W. Carpenter	949	A multi-zonal integral method for problems involving unsteady one-dimensional heat conduction with change of phase
R. Siegel	959	Separation of variables solution for non-linear radiative cooling
M. Kaviany and M. Mittal	967	Natural convection heat transfer from a vertical plate to high permeability porous media: an experiment and an approximate solution
H. Ross, R. Radermacher, M. di Marzo and D. Didion	979	Horizontal flow boiling of pure and mixed refrigerants
R. N. Pande and F. Gori	993	Effective media formation and conduction through unsaturated granular materials
J. Verhás	1001	Irreversible thermodynamics for the rheological properties of colloids
T. Nishimura, A. Tarumoto and Y. Kawamura	1007	Flow and mass transfer characteristics in wavy channels for oscillatory flow
M. Ogawa	1017	Mass transfer of mixed gas flow crossing a high temperature graphite cylinder with chemical reactions and in-pore diffusion

June

J. R. Hull and J. M. Mehta	1027	Physical model of gradient zone erosion in thermohaline systems
A. A. Pesaran and A. F. Mills	1037	Moisture transport in silica gel packed beds—I. Theoretical study

A. A. Pesaran and A. F. Mills	1051	Moisture transport in silica gel packed beds—II. Experimental study
F. B. Cheung	1061	Free convection heat and mass transfer during pool penetration into a melting miscible substrate
C. I. Staicu	1077	Variational treatment of quasi-stationary thermal conduction through flat plates
J. Bellan and K. Harstad	1083	The details of the convective evaporation of dense and dilute clusters of drops
W. Mojtahedi	1095	Effect of an immersed tube-bank in a gas fluidized bed
W. W. Pulkrabek and W. E. Ibele	1103	The effect of temperature on the permeability of a porous material
H.-T. Lin and L.-K. Lin	1111	Similarity solutions for laminar forced convection heat transfer from wedges to fluids of any Prandtl number
G. Wilks and R. Hunt	1119	Vertical mixed convection flow about a horizontal line source of heating or cooling
I. Y. Chen and G. Kocamustafaogullari	1133	Condensation heat transfer studies for stratified, co-current two-phase flow in horizontal tubes
H. Amir, G. Le Palec et M. Daguenet	1149	Séchage superficiel d'un matériau poreux humide par convection forcée d'air chaud: couplage entre les équations de transfert dans le matériau et celles de la couche limite
J. E. Doorly and M. L. G. Oldfield	1159	The theory of advanced multi-layer thin film heat transfer gauges
K. Mishima and H. Nishihara	1169	Effect of channel geometry on critical heat flux for low pressure water
W. S. Kim, J. K. Park and H. N. Chang	1183	Mass transfer in a three-dimensional net-type turbulence promoter
T. Ota and H. Nishiyama	1193	A correlation of maximum turbulent heat transfer coefficient in reattachment flow region
Y. Kurosaki and I. Satoh	1201	Laminar heat transfer in an asymmetrically heated rectangular duct

M. PRUD'HOMME, L. ROBILLARD and P. VASSEUR — 1209 A study of laminar natural convection in a non-uniformly heated annular fluid layer

Technical Notes

GH. JUNCU and R. MIHAIL — 1223 The effect of diffusivities ratio on conjugate mass transfer from a droplet

H. G. SHARMA and K. R. SINGH — 1227 Heat transfer in the laminar flow of a non-Newtonian fluid in a porous annulus by the method of quasilinearization

R. M. FAND, T. ZHENG and P. CHENG — 1231 The general characteristics of boiling heat transfer from a surface embedded in a porous medium

July

E. M. SPARROW, S. S. KANG and W. CHUCK — 1237 Relation between the points of flow reattachment and maximum heat transfer for regions of flow separation

E. M. SPARROW and T. A. MYRUM — 1247 Experiments on natural convection in complex enclosed spaces containing either two fluids or a single fluid

N. M. TSIRELMAN and A. V. ZHIBER — 1259 Solution of the unsteady-state heat conduction problem for a two-dimensional region with a moving boundary

I. NEUDACHIN, S. GIVOTOV and V. PODDUBNYI — 1269 Kinetic boundary layer treatment in the problem of a rarefied gas flow through a perforated wall by the method of moments

A. RANDRIAMAMPIANINA, P. BONTOUX et B. ROUX — 1275 Ecoulements induits par la force gravifique dans une cavité cylindrique en rotation

J. I. FRANKEL, B. VICK and M. N. ÖZISIK — 1293 General formulation and analysis of hyperbolic heat conduction in composite media

J. R. MAUGHAN and F. P. INCROPERA — 1307 Experiments on mixed convection heat transfer for airflow in a horizontal and inclined channel

Y. ZVIRIN — 1319 Instabilities in a double-diffusive thermosyphon

M. WANG, D. R. KASSOY and P. D. WEIDMAN — 1331 Onset of convection in a vertical slab of saturated porous media between two impermeable conducting blocks

D. A. DE VRIES — 1343 The theory of heat and moisture transfer in porous media revisited

R. M. Fand and R. T. Phan	1351	Combined forced and natural convection heat transfer from a horizontal cylinder embedded in a porous medium
J. Y. San, W. M. Worek and Z. Lavan	1359	Entropy generation in combined heat and mass transfer
D. W. Condiff	1371	Anisotropic scattering in three-dimensional differential approximation for radiation heat transfer
M. Al-Arabi, M. A. I. El-Shaarawi and M. Khamis	1381	Natural convection in uniformly heated vertical annuli
K. Vafai and R. Thiyagaraja	1391	Analysis of flow and heat transfer at the interface region of a porous medium
M. Kaviany and M. Mittal	1407	Funicular state in drying of a porous slab
D. A. Booth, P. A. Glover and N. Sheriff	1419	Natural convection measurements in a mercury-filled rectangular plenum
Z. Bilicki, J. Kestin and J. Mikielewicz	1427	Two-phase downflow in a vertical pipe and the phenomenon of choking: homogeneous diffusion model
C. K. Law, T. Y. Xiong and C. H. Wang	1435	Alcohol droplet vaporization in humid air
J. H. Masliyah	1445	Heat transfer from a porous composite sphere immersed in a moving stream
N. Padmanabhan	1453	Entry flow in heated curved pipes
H. C. Ünal	1465	Temperature distributions in fins with uniform and non-uniform heat generation and non-uniform heat transfer coefficient
R. Mosdorf and M. Poniewski	1479	Statistic analysis of the boiling curve for a droplet
S. Motakef	1487	Effect of natural convection and thermal transparency of liquid encapsulant on thermal stresses during LEC growth of GaAs
T. K. Nguyen and C. T. Avedisian	1497	Numerical solution for film evaporation of a spherical liquid droplet on an isothermal and adiabatic surface

G. Le Palec and M. Daguenet 1511 Laminar three-dimensional mixed convection about a rotating sphere in a stream

J. Arnaldos and J. Casal 1525 Study and modelling of mass transfer in magnetically stabilized fluidized beds

M.-C. Chyu 1531 Evaporation of macrolayer in nucleate boiling near burnout

Technical Notes

A. Jordan, A. Szybiak, M. Benmouna and A. Barka 1539 Temperature distribution in a cylindrical conductor with skin effect

S. Nag and M. Raja Rao 1541 Forced convection heat transfer in smooth tubes roughened by helically coiled ribbons

B. J. Huang 1544 A combined convection correlation for vertical downward cooling flow in a natural circulation loop

C. Beckermann and R. Viskanta 1547 Forced convection boundary layer flow and heat transfer along a flat plate embedded in a porous medium

K. J. Negus and M. M. Yovanovich 1552 Simple separability for steady heat conduction with spatially-varying thermal conductivity

S. L. Lee, T. S. Chen and B. F. Armaly 1556 Free stream effects on the wave instability of buoyant flows along an isothermal vertical flat plate

Letters to the Editors

S. A. Gökoğlu 1559 Discussion of Mills *et al.* on "The effect of wall suction and thermophoresis on aerosol particle deposition from a laminar boundary layer on a flat plate"

A. F. Mills 1560 Reply to 'Discussion of Mills *et al.* on "The effect of wall suction and thermophoresis on aerosol particle deposition from a laminar boundary layer"'

P. D. Weidman 1561 A note on "Mass and heat transfer by natural convection in a vertical slot filled with porous medium"

Book Review

C. J. Lawn 1563 Flowfield Modeling and Diagnostics, by A. K. Gupta and D. G. Lilley

August

R. I. Soloukhin, O. G. Martynenko and R. Pohorecki 1565 In Memoriam—Professor J. W. Ciborowski (1918–1986)
